

## Purchase Guidelines

We welcome any questions that you may have about our dogs or contract options. Selecting a dog from us will be an affordable way to own a great dog that you will have for many years of companionship. With that, we will provide:

1. AKC registration papers (which are important to you and the breed) proving the:
  - Purebred German Shepherd dog status of your new companion.
  - Registered names and numbers of your companion and its parents.
  - Provable genealogy, showing concern for the preservation of purebred breeds for the future generations of humans to enjoy and breed.
  - DNA- and breed-specific qualities for temperament, type, looks, movement, workability, and health.
2. Six-week pet insurance at no charges for purchases under 22 weeks of age. This includes:
  - \$1,500 to cover veterinary fees for illness and accidents (some restrictions) provided through the AKC if you qualify based on your location. Please consult the [AKC site](#).
  - \$150 for advertising and reward if your pup is lost or stolen.
  - Free certifications, as well as the titling paperwork for ancestors. These documents will be proudly presented as a testament to our dedication to this incredible breed and its preservation.
  - A two-week supply of NuVet vitamins to get your pup started on a healthy life.
  - Imodium and Albon for your pup's first few days home to help it adjust without health issues.
  - Full-color DVDs with five or more generations of your pup's pedigree. These DVDs will include training videos to help you learn the techniques to train your dog to perfection. We are always glad to provide DVD-upgraded videos of obedience all the way to Obedience Trial Champion (OTCH).
  - \$250 for death benefit.
  - \$1,150 worth of coverage at no charge to the new owners.
3. A puppy pack that includes:
  - Premium dog food kits that have food for your puppy's first few days.

- A 300-page manual with a comprehensive selection of articles for all stages of your canine's life. This is to help new owners understand the dog's training, feeding, vet, and general health needs.
  - Three or more generational picture pedigree of your pup's family tree, complete with documents verifying OVC or OFA HD to promote a balanced immune system and help prevent disease and cancer.
  - A Health Record Medical Lifetime booklet.
  - An adjustable collar.
4. All pups going home will be:
- Vet-checked with documentation
  - Dewormed with documentation
  - Administered with first heartworm medication
  - ISO-microchipped
  - Tattooed in accordance with the AKC and CKC
  - Vaccinated with at least two sets
  - Groomed by bathing, nail trimming, and ear cleaning
  - Given an adjustable puppy collar
  - Given a puppy starter kit with puppy food included
  - Home-raised with children and other animals
  - Introduced to crate training and house training
  - Raised with canine behavioral motivational social training techniques
  - Raised with hands-on touch therapy for better human-animal bond development

This is an example of the approach we take to making your purchase process seamless.

This is a health form that will accompany each pup that leaves our home.
